Summary

I have always enjoyed creating stories and the characters. In High School, during the summers I participated in art and story building classes at the U.W. Madison. My professor recently commented on a story that I wrote for a Sci Fi class that it contained clever ideas, surprising outcomes and was very imaginative.

I am very comfortable working with computers and software packages. When unsure of a situation, I am able to research to find the answer and am not afraid to seek assistance.

I have installed various software packages and find it quite simple. I've taken courses in web design and have used this knowledge to design my own website.

I am very interested in gaining industry experience and to use the training I have received.

Skills

- ▶ Maya
- ▶ Photoshop
- ▶ Illustrator
- ▶ Premiere

Experience

Stockroom Clerk (June 2005 – September 2012)
ETC- Middleton, Wisconsin

I worked Summers for Electronic Theatre Controls.

The employer trusted my abilities and thoroughness to allow me to work independently.

I worked not only in the stock room, but also in all phases of the manufacturing portion of a multi-million dollar lighting company.

I enjoy working with others.

Education

UW-Stout, Menomonie, Wisconsin

Game Design/Art, with a Minor in English

Currently in my fourth year of college.
